We are proud to announce that PowerTrunk is organizing a Seminar in Land Mobile Radio on the 19th of August at the Wentworth by the Sea Hotel Hotel in New Castle, New Hampshire.

PowerTrunk's sales have grown spectacularly in recent years, based on landmark projects such as New Jersey Transit, BC Hydro, Ontario Power Generation, Agnico Eagle Mining, LAX and JFK airports, among others.

During the past year of 2015, PowerTrunk has strengthened its leadership position in the TETRA and complementary solutions market with particular success in the Utilities and Transport (metros, buses, and railways) sectors.

Having obtained several important projects during 2015 and 2016 such as Diverse Power (GA), San Francisco Airport, and New York City Transit, PowerTrunk is on track to continue to consolidate its growth with TETRA technology over the next two years.

PowerTrunk Inc. was the first company to be awarded type acceptance for its TETRA network infrastructure and radio terminals by both US and Canadian regulators - FCC and Industry Canada – and is today the market leader for TETRA solutions in North America.

With more than 50 countries around the world with successfully deployed TETRA projects, PowerTrunk is pleased to invite you to participate with us at the Land Mobile Radio Seminar on the 19th of August at the Wentworth by the Sea Hotel, in New Castle, NH, where we will discuss the latest developments by PowerTrunk for Mission Critical Communications, Professional Mobile Broadband, and Railway Signaling over TETRA, among other topics.

If you want to attend the event please register at: [powertrunk.com](http://powertrunk.com) We look forward to seeing you at the PowerTrunk LMR Seminar!!
